

# *Ural Accessories*

## *Side Car Wood Dashboards*

PN 10046

Now here's a cool addition to your sidecar - a genuine wood dashboard! Mounts to windshield brackets (actually sandwiches between windshield and bulkhead brackets) - no holes to drill when installing. Dresses up cockpit area. Dual rocker panel switches (not shown) and cigarette lighter-style accessory outlet included. Ural badge applied to wood on right hand side. Wood finish is urethane for all-weather protection. We use kiln dried Alder wood to make the dash. Mount radio, iPod or CB in dash if you like. Dash can be ordered with custom opening at extra charge. Size for custom openings must be supplied at time of order.
