*Single Tube Rear Bumper*

**PN 10099**

Our newest side car rear bumper features a single-tube design with a tube diameter matching our front bumper tube diameter. Unique to this design are saddle-type mounts that require no drilling to mount. Buckhorn ends of the bumper tube are fully capped so as to eliminate catch points. Finished in semi-gloss black powder-coat. It is rugged, strong, and serves to protect the rear of the sidecar from impact damage. Handsome in appearance - it also can be wound with safety reflective tape. Manufactured from DOM .090 steel tubing.
