Emergency Air Compressor

PN 10108

How about a mini, battery-operated, air compressor for your trunk? It's 5-1/2" long, 2-7/8" wide, 4-7/8 high. Output is rated at 250 PSI, has a pressure gage rated in both PSI and BAR, a 10-foot cord equipped with plug for power point connection, an 18-inch air hose tipped with a positive capture air chuck. On/off switch standard. Impact resistant body. Do yourself a favor and dump that manual air pump (sometimes called a Russian aerobics device). Air up anywhere!

An Inexpensive Solution to An Old Problem!
