

Ural Performance

Chrome "Smoothy" Header Pipes

PN 10138

2-Step chrome plated header pipes without cross tube connections. Eliminates burning your fingers when you change oil on a hot engine. Stops heating front of the crankcase and the leading edge of the sump. Two-step chrome resists discoloration from hot exhaust gasses better than three-step (copper, nickel, chrome). Furnished in flange-style header configuration for 2006 and newer Urals. Sold as a pair. Carbon steel headers are polished before chroming for a high luster appearance. Use of smooth headers aids in tuning as there is no reversion wave bouncing between the cylinders during valve overlap period (prove this to yourself with a mercury stick). Comes with new exhaust gaskets. Sold as a pair.
