

# *Ural Performance*

## *Extra Length Un-plated Header Pipes*

*PN 10151*

OK! You asked for it, you got it! For the do-it-yourself guy who wants to make up his own custom exhaust system, our extra-length header pipes are just the ticket. Plain carbon steel headers are the exact bend radius as the factory headers. Equipped with flanges, they fit 2006 and newer Urals or flange head retrofits. Long length means you can weld and bend to your needs. Muffler shops can perform the simple bends at the long end locally. Allows custom applications without having to section the headers with add-on pieces. Sold in pairs only. "Smoothy" style has no cross pipe stubs - ceramic coating is available at extra cost.

*Gee - Maybe Now We Can Make "Pipes"*
