2WD / Reverse Shift Kit

You asked for it - you got it! Introduced one year ago by popular demand our 2 wheel drive and reverse shift kit eliminates having to bend over and reach behind your ankles for either shift control. "At your fingertips" two lever system manufactured from CNC machined and welded steel components, featuring stainless steel hardware, bronze bushed lever pivot points, gloss black powder coated finish, rolled thread plated steel drag links tipped with spherical rod ends. Bolt on installation no drilling or welding required, instructions and pictures come with kit. Shift balls thermoplast material with threaded metal inserts.

Shift alongside gas tank - not your ankles!
