

# *Ural Tools*

## *"Old-Man" With ECAT Rivet Gun*

*P/N RW1000134 TO*

For the Professional Mechanic!

Working on Ural's unique fastener system can some times be a time consuming chore. Here is a combination tool that really speeds things up! "Old Man" tool allows leverage to be applied when removing flat head screws used throughout the engine - without wrecking the screw head. ECAT "corner" type rivet gun applies just enough "bumping" to allow the screw to loosen (much as a "hammer" tool does but better). This tool can be used on a Ural clutch - engine in frame - to take the thrust plate screws out! Uses 3/8" interchangeable bits - flat, Phillips, Allen type! Rivet gun doubles for all types of rivet installation.

*Cost / Benefit Ratio Worth The Price !*
