## *Power Arc Coil Mount*

Heavy duty coil mount for Power Arc ignition coils. Fits all Ural motorcycles. Simply remove steering damper anchor bolt, slide coil mount under damper anchor, replace bolt, bolt coil on and it's a done deal. Design allows coil to be mounted away from engine heat with plug wire towers pointing down (prevents water from invading plug wire towers). Stiffness of design prevents coil vibration when in service. Manufactured from Stainless Steel for corrosion control and appearance. Low tension wires are shielded from moisture pooling at connection points due to downward mounting. Install requires no drilling / welding.
