Helmet Lock

P/N RW 900118 A

If your trunk is stuffed - then where do you put your lid so it doesn't walk away? Answer is the Ural helmet lock. Drill one hole to install it. Outer half of the clamshell lock can be left in the trunk until you want it - using it only when the need arises. Avoids having to leave the helmet vulnerable (like in the sidecar) or having to lug it around while you eat or shop. Powder coated steel lock assembly comes with two keys, instructions, boxed. Mounts to rear fender valve panel - looks as though it belongs there.

Avoid Donating Your Lid To A Stranger!
