

# *Ural Mirrors*

## *Rear View Mirror For Hack*

*P/N RW970104 M*

Passengers need rearward vision too!. We modified our standard bar end mirror to make an easy to mount side car mirror that swings up or down in click stop increments as well as orbital positioning of the mirror itself. Drill one hole to mount (we suggest you pierce the black vinyl apron as it makes for a more sanitary installation as opposed to cutting an opening in the apron). Chrome plated or black. If you use bar end mirrors - then all your mirrors match! Swings up out of the way for passenger entry or exit. Hardware included

*You Get Both - Function And Looks !*
