*Vacuum Brake Bleeder Adapter*

*P/N RW 1000131 TO*

Eliminate messy and time consuming brake bleeding chores with the Ural vacuum bleeder adapter. Simply unscrew the master cylinder cover, install the bleeder adapter cover, plug on a hand operated vacuum pump and apply vacuum. Air trapped in the system is pulled to the top of the reservoir. CNC milled billet adapter comes with NPT bayonet fitting, gasket and instruction sheet. You supply the vacuum pump (pump shown in picture is a Sears & Roebuck pump). Made from 6061 T6 aluminum alloy. This small but useful tool saves time, wasted brake fluid and eliminates the mess associated with crack and pump bleeding methods.

*Vacuum Trapped Air - It's Quicker !*
