

Ural Saddles

“Day Long” Saddles

P/N RW985101 Ss

Custom made saddle to fit your Ural. Called the Day Long because it lets you ride all day long. Saddle is built onto stock Ural seat pan. It provides the luxury and support of a solo seat - yet has room aft to park a passenger if needed. Large flat spring forms the cantle and wings which are then covered in top quality foam and over coated with stitched HD vinyl cover. Design provides support to the thighs so the peeling action of wind passing between tank and thigh is much moderated. Cantle prevents rearward sliding under acceleration and on steep climbs. Sold on exchange basis - if you don't have a useable saddle pan - we can supply one at additional cost. Beautiful design stitched top cover.
