Pro Engine Building Stand

P/N RW 1000101 TO

Professional engine building work stand. Quit rolling your engine around on the work bench or floor when doing an engine build. Our heavy duty all steel construction stand rotates the engine 360 degrees in one plane and 90 degrees in the other plane. Mounts engine using Ural engine thru studs. Rotation controlled by socket operated ratchet built into stand - automatically locks engine mount at desired angle by simply removing drive socket. Allows access to cylinder openings, crankshaft / clutch, engine front gear drive section, sump opening - allowing engine to be built entirely on the work stand. Height adjustable. Stand base has four hole mounting system - fastens to concrete floor with Red Head concrete floor anchors for a wobble free stand. Powder coated Red. This stand will pay for itself in time saved in about 10 engine builds. Customers who see their engines built on this stand are convinced they are in the hands of a professional business. Red Head concrete anchors supplied with stand along with engine studs / nuts and spacers. Mount design allows reverse mounting of the engine when or if needed.
