Ural engine test stand

P/N 1000116 TO

Custom made test stand for testing the Ural engine / transmission. Less than 15 minutes to install a new / rebuilt Ural, Dnpir or Chang Jiang engine. Rolls on pneumatic tires. Ball bearing wheels, Wagon pull handle has "parking" feature. Dual wheel brake so you won't have to chase it across the parking lot. Overhead fuel system. Dash contains Ural speedometer, tachometer, off / on switch for box fans, Grounding switch for testing Power Arc ignition curves, hand throttle, functional clutch handle & cable, mounts for ignition coil and module, spark plug rack, battery box, cables & wiring. Digatron CHT / EGT instrument easily slaved to lap top ammeter. Add water brake and you have a dyno.! Heavy duty box section steel frame, MIG welded throughout, Finished in red powder coat paint. Do your engine run-up and transmission test BEFORE you install an engine into the frame, spot oil leaks, set timing easily, check operating temps, and so forth.

A professional Grade Test Stand That Will Last A Lifetime
