

Ural Tools

Flywheel Locking Tool

Around the shop - this tool is know as the Gorilla !
Used to lock the flywheel in place while torquing the flywheel at Ural's "OH My God" torque specs. Very useful in-frame or engine building stand fixtures - tool positively locks the flywheel while the BIG torque wrench is applied. No damage to flywheel as anti rotation pins fit snugly into spring receivers in the flywheel. Manufactured from high strength box section steel tubing, anchor pins are machined to a press fit in the arm and MIG welded in place. Assembled tool is red powder coated , Cutaway section allows passage of flywheel nut socket and is fully boxed in.

Once you use it - you won't be without it!
