

Ural Exhaust

High Mount Exhaust System

P/N RW935101 E

Off road riders have been asking for a rugged high mount **dual** exhaust system for quite a while. Well here it is. We have eliminated the "cross" pipe resulting in an easier to tune engine - no more reversion flows between cylinders. Smooth style header pipes and extensions as well as mufflers are ceramic coated to reduce heat signature (also good neighbors shouldn't start grass fires with red hot headers !) Mufflers are double bracketed factory "Wolf" units shipped un-chromed to the USA. Ceramic coatings are applied in the USA. Free flowing exhaust system allows header pipe lengths to be matched for good scavenging. Mounting brackets & hardware included.

Ground Clearance - Plus Performance !
