*Slat Board Kit For Ural Luggage Rack*

*P/N RW 900103 A*

"Woodie" looks are always "in style" - ever since the surfer movies popularized the "look". So here is our contribution to days of "yesteryear". Stained white oak slats machine grooved to precisely fit the Ural luggage rack cross rods. Gorilla glued to cross rods, seated at the ends to prevent turning and secured with metal brackets and screws. Mounting is simple and requires only a screwdriver. Instructions come with. Prevents "printing" luggage caused by road vibration. Urethane coated for all weather protection
