

# Ural Tools

## Tube Wringer

P/N RW 1000137 TO

Bet you haven't seen one of these before! This tool literally pays for itself in a very short time. As much as 20% of product in a tube is left behind because hand squeezing methods cannot force all the product out. This is waste.! Comes now the Tube Wringer and you get 100% of the tube contents out of the tube. Simple to operate - one hand holds the tube rollers in firm contact with the tube - the other hand turns the key. Even if the tube is half empty - you get to see how much product is left so you can reorder in time and prevent run out. Tube rollers are gear tooth form so they really compress the tube.

*Put The Squeeze On Waste !*
