Now here is an useful aid to safety - Led strip style stop light attaches to rearmost board of our slat board kit on the luggage rack. Provides a really brilliant light to warn following vehicles you are slowing or stopping. Height of the strip light makes the rear of your Ural much more visible to following traffic. Mounts to slat board with screws. Simple to wire in to the side car wire harness. Is not so large as to look out of place on the bike.

*Light Up - Be Seen - Be Safe!*
